DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-10 are rejected under 35 U.S.C. 102(a) as being anticipated by Kim et al. (US 2002/0006626A1).

Kim et al. discloses a process for preparing monolayers and microarrays of biomolecules by reacting functionalized dendrimers on a solid surface with biomolecules such as proteins, antigens, antibodies, enzymes, ligands, receptors, and the like. The process comprises the steps of: reacting a metal surface or a glass surface with a solution of alkanethiol or derivatized silane with amine reactive functionality to obtain a self-assembled monolayer; reacting the self-assembled monolayer with amineterminated dendrimers to give micropattern of dendrimers; and, reacting the patterned dendrimers with a biomolecule of protein, antigen, antibody, enzyme, receptor or ligand which is viewed as being inclusive of the extraction step. (See Figures and pages 1-2).
